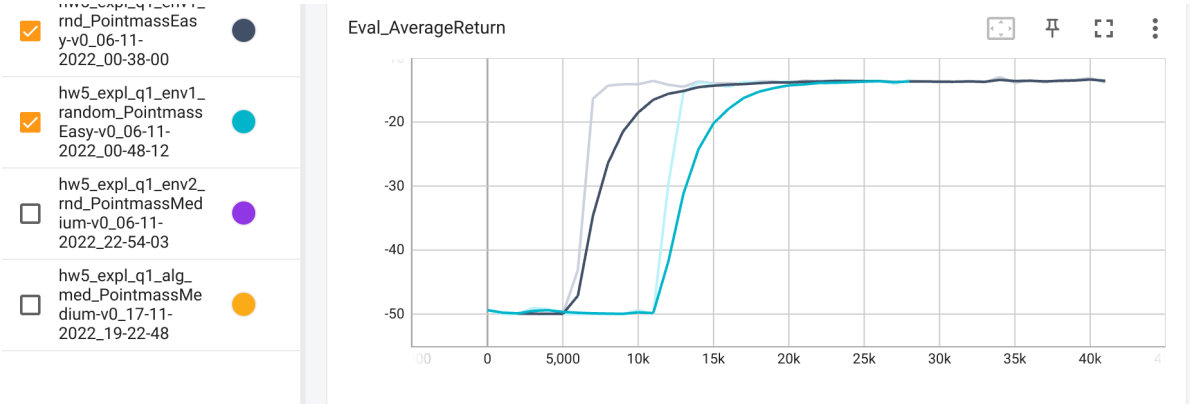
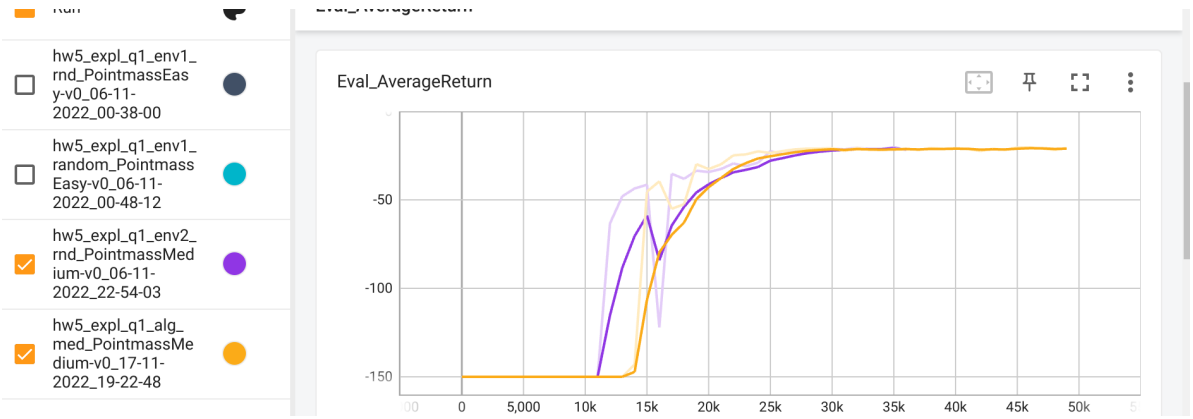
HW 5 Exploration and Offline RL

Part 1

For easy case

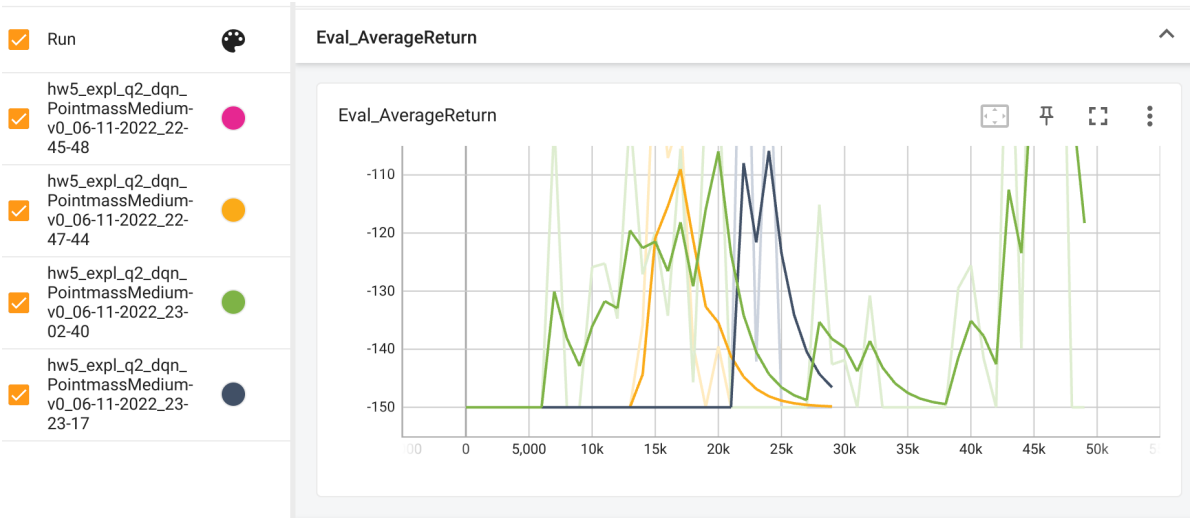


For medium case in rnd and alg using boltzman

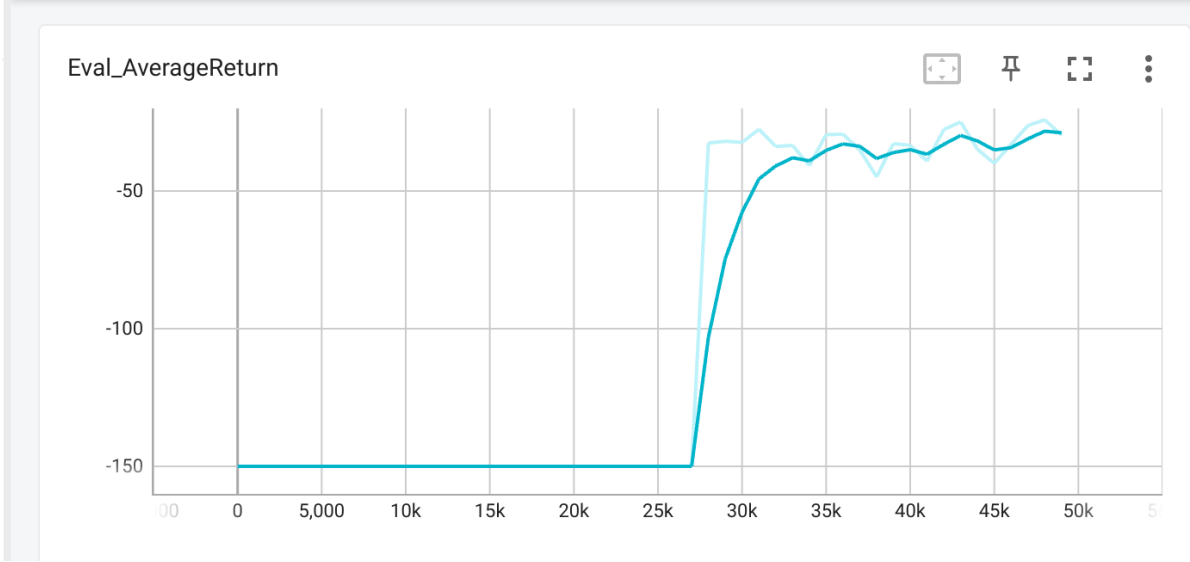


Part 2 Offline RL on exploration

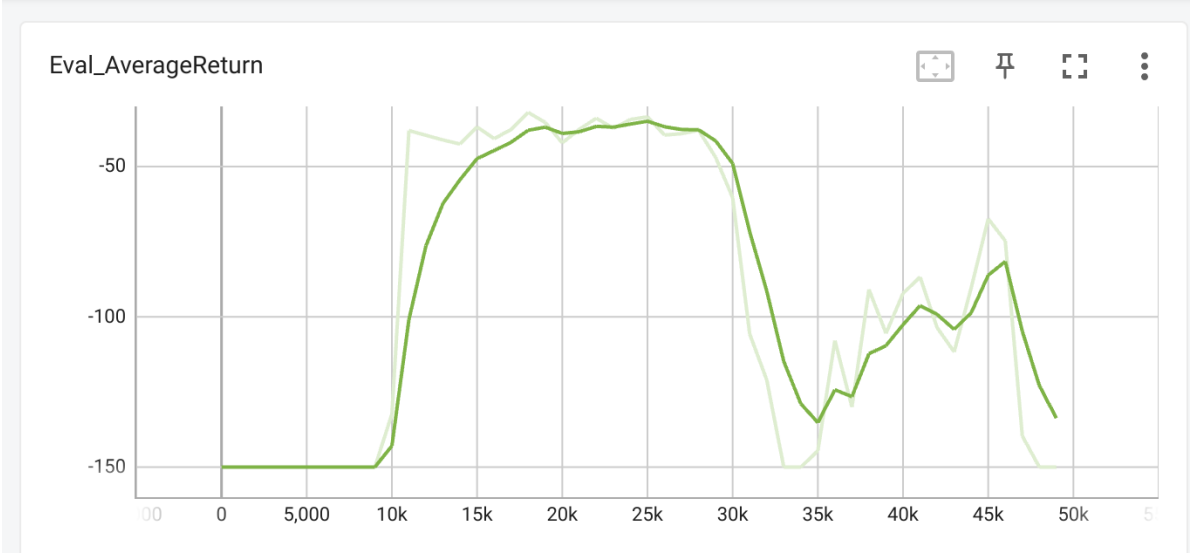
For DQN



For CQL

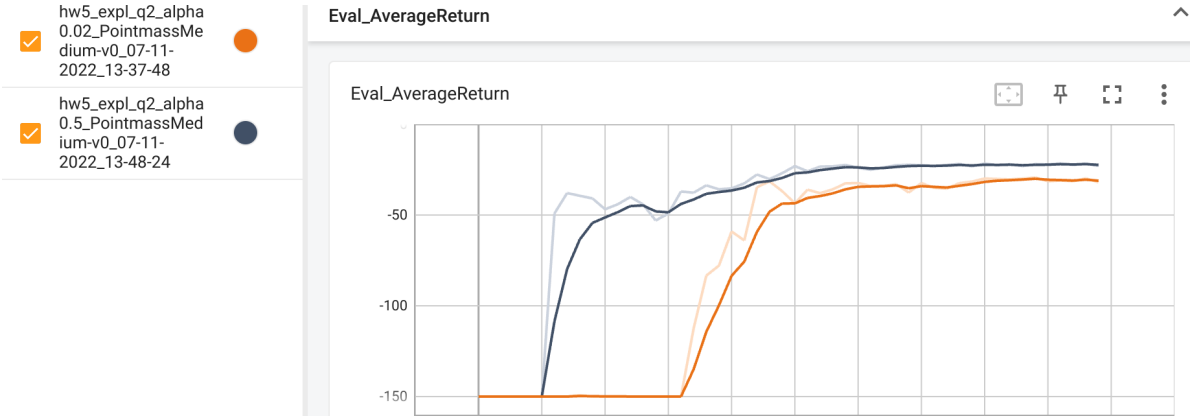


For tuning numsteps



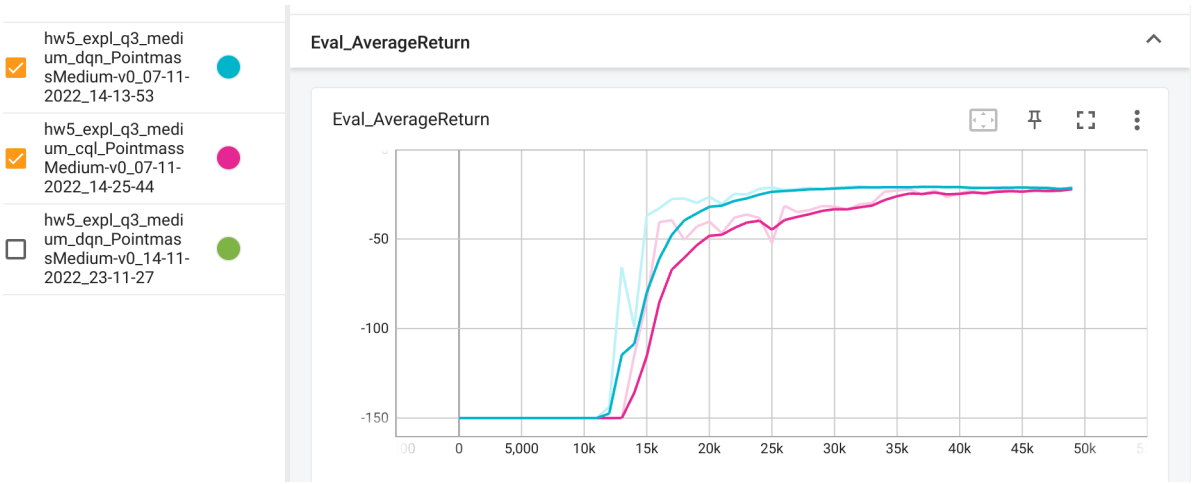
numsteps = 5000

For tuning cql alpha

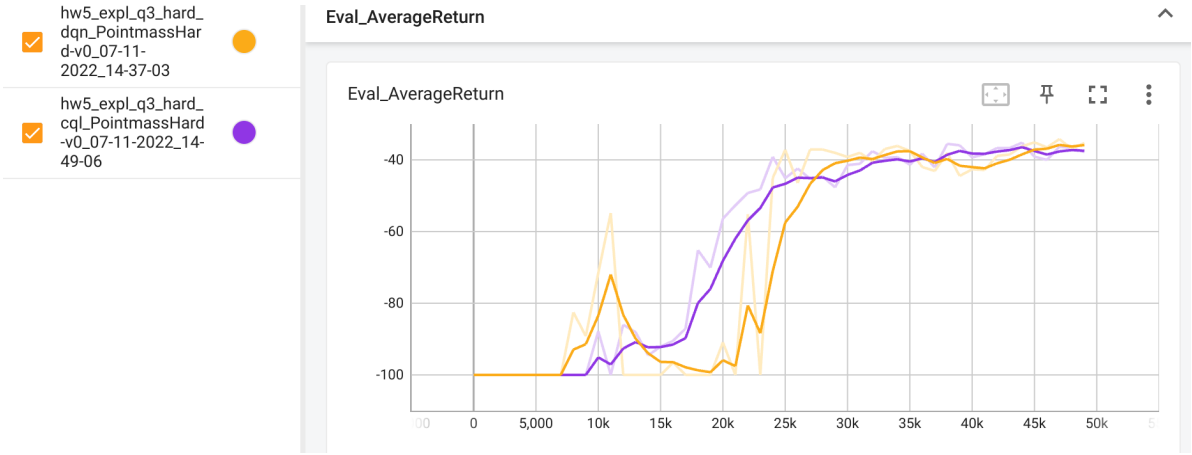


Part 3 Supervised

For medium cases

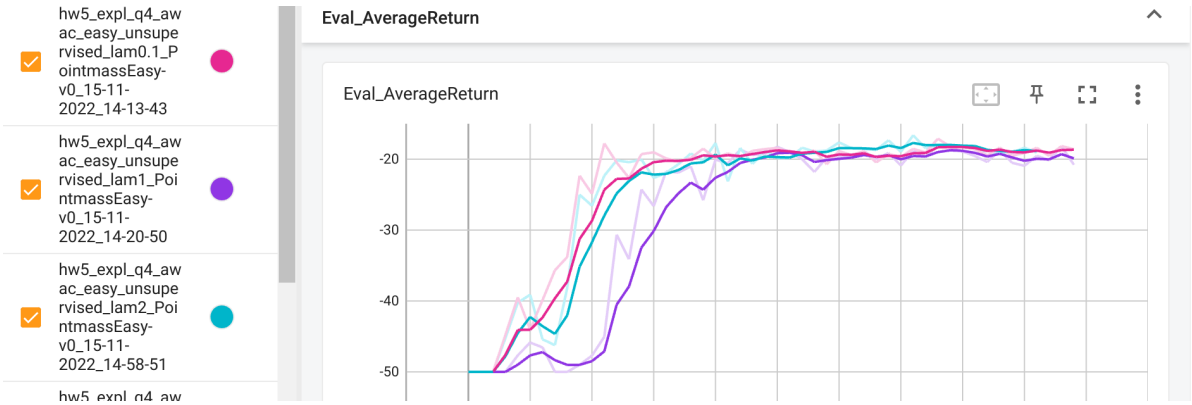


For hard cases

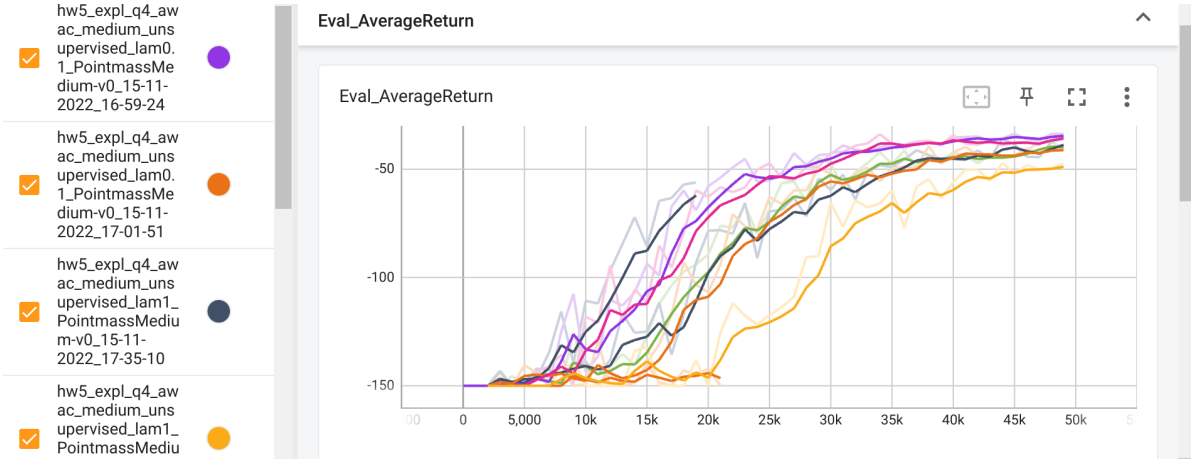


Part 4 AWAC

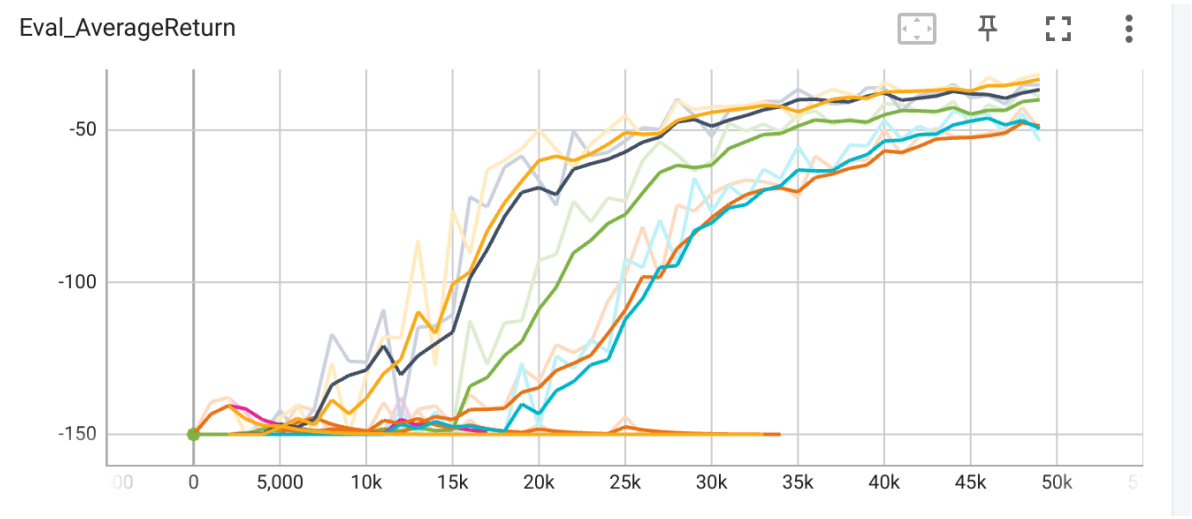
For easy



For medium unsupervised (tuning lambda)



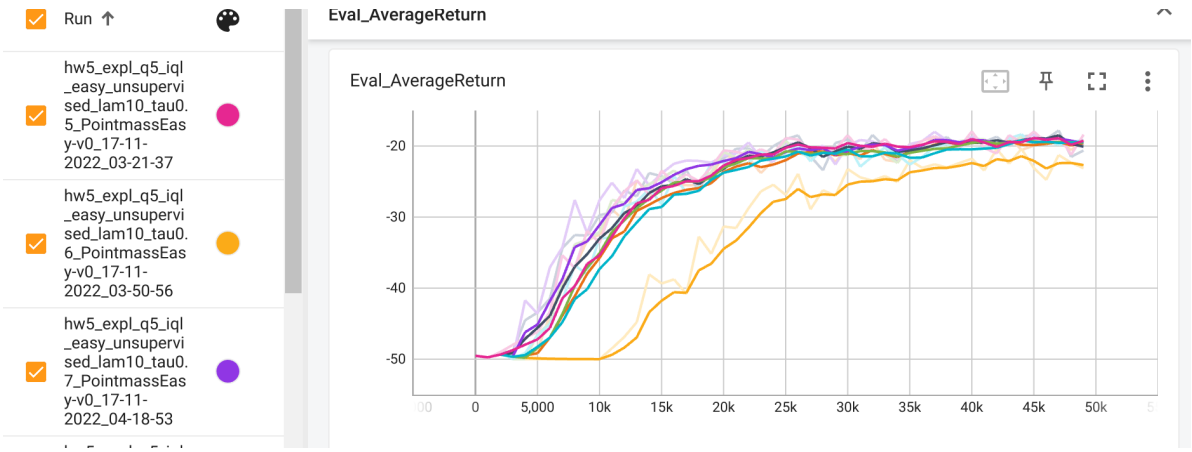
For medium supervised (tuning lambda)



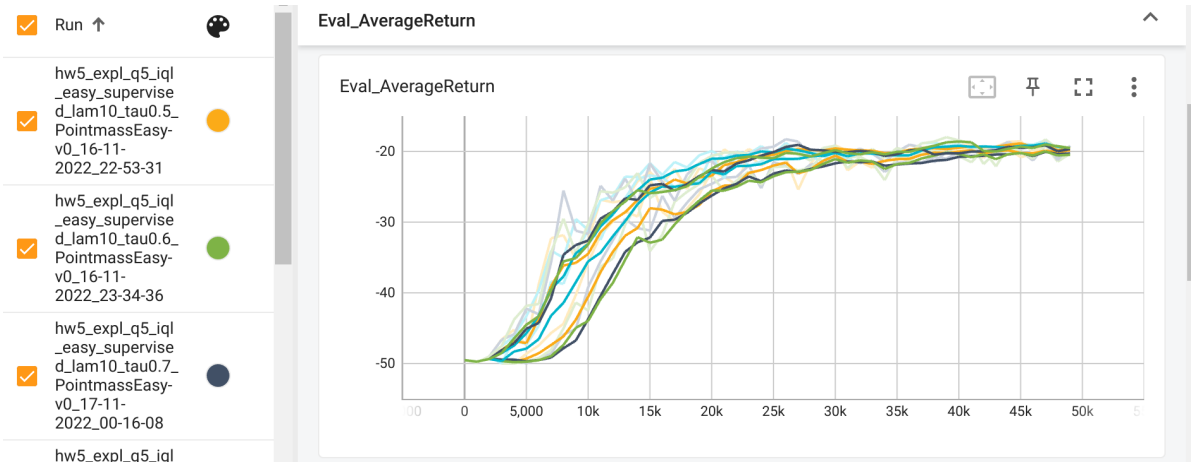
lambda = 10 is the best

Part 5 IQL

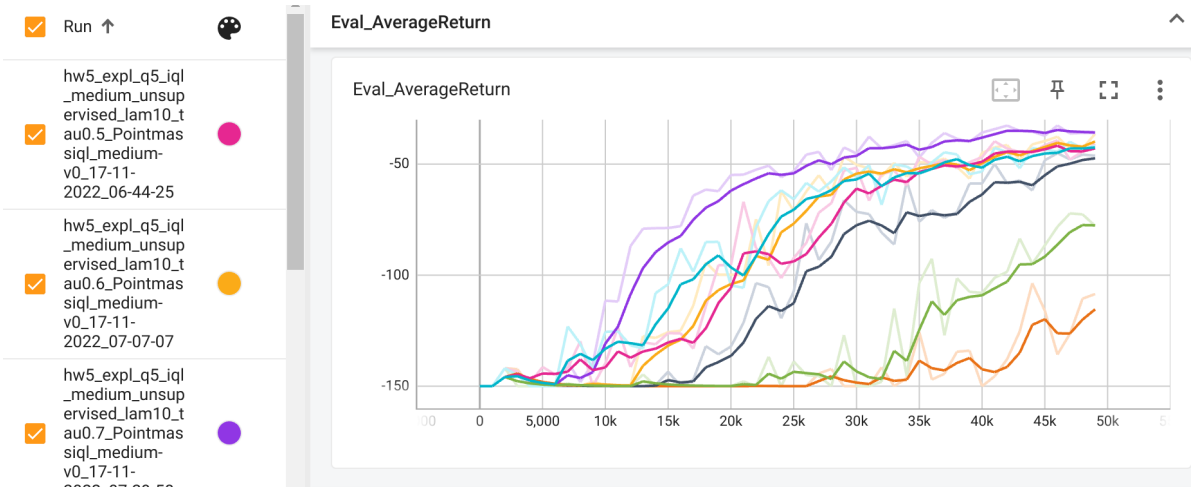
For easy unsupervised

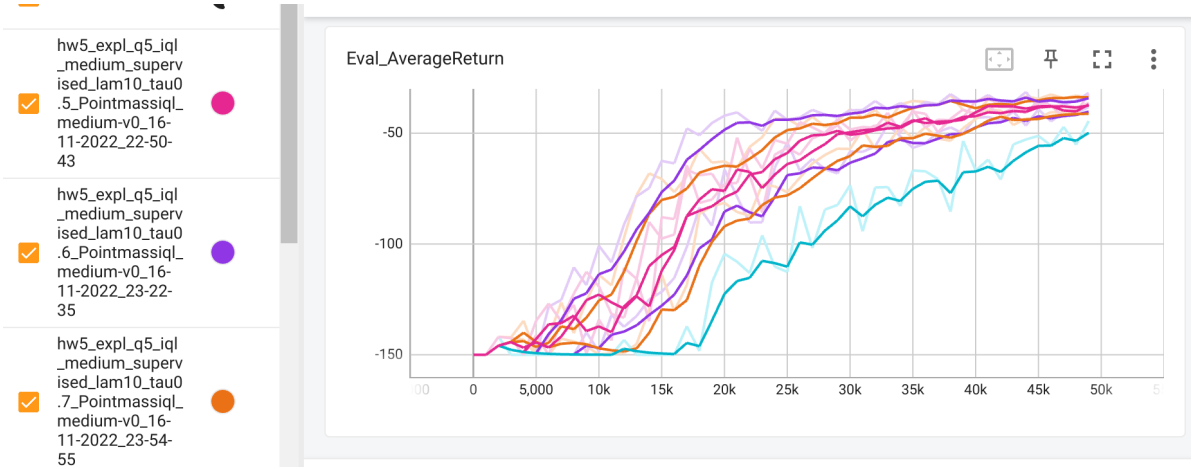


For easy supervised



For medium unsupervised





For medium supervised
